PENINSULA IS A LEADING MARINE ENERGY SUPPLIER AND RESELLER

We supply marine energy to over 2,000 customers in more than 500 worldwide ports.
Peninsula powers the global fleet and keeps energy flowing.

Today, we are a global leader in marine energy solutions with a major presence in the world's leading bunkering hubs, as physical suppliers or resellers.

We are paving the way towards a lower carbon future as the only independent supplier to offer conventional fuels, Biofuels and LNG simultaneously.

PHYSICAL STRENGTH

Peninsula is the largest independent physical supplier in the world.

We support significant scale with deep experience and full supply chain control.

Peninsula focuses on quality and reliability, offering tailored solutions to customers that removes the stress from bunker procurement.

GLOBAL REACH

Peninsula spans the globe with 19 offices located in the world's major shipping and bunkering hubs.

Populated with dedicated professionals who know their business and local market, Peninsula is truly able to offer global knowledge with local insight.

HOW WE DO IT

FULL CONTROL OF OUR SUPPLY CHAIN

Cargo

Peninsula's cargo networks ensure optimum sourcing options. Peninsula also trades cargo and can provide credit and funding structures for purchasers.

Shipping

Peninsula's sister company, Hercules Tanker Management (HTM), provides comprehensive chartering solutions to support our global trading platform. HTM can also assist customers purchasing cargo from Peninsula with their chartering requirements. Our mix of owned and chartered-in tonnage keeps us flexible and dynamic.

Storage

Peninsula's strategic storage positions provide consistency of supply and underpin our logistics strength. Storage also enables us to blend and rotate our tanks to trade and sell cargos.

Sales

Peninsula's sales professionals provide bespoke marine energy solutions. Our supply-focused experts provide market intelligence, logistics and pricing expertise from their respective regional supply zones.

Logistics

Peninsula has deep rooted experience in guaranteeing operational excellence. Our fleet is tailored to specific supply operations, ensuring that our logistics footprint delivers the optimum balance of speed, quality, safety and reliability.

Operations

Peninsula's operations teams ensure seamless supply and service delivery. Working 24/7 with ship agents, port authorities, barges, terminals and other intermediaries delivers incident-free supply to our customers.

SOLUTIONS DRIVEN

Peninsula's hybrid sales model means we're much more than a physical supplier. Our reselling business buys and sells marine energy in over 500 global ports. We only work with carefully vetted suppliers and provide comprehensive post-fixture support.

Contracts & Risk Management Solutions

Peninsula boasts specialist hedging teams in London, Singapore and Houston. We can design a wide range of fixed and floating structures to suit your needs. We also provide derivative solutions to help hedge your bunker exposures.

Alternative Fuels:

Peninsula is a physical supplier of LNG from our bespoke bunkering vessel, the LNG Levante. We can meet your supply requirements, plus ancillary services, across the Western Mediterranean. Our specialist Alternative Fuels Desk can also trade LNG, for shipping customers, and provide comprehensive technical support.

Biofuels are available across Peninsula's physical network and our ISCC-certified companies provide full chain of custody expertise, for both physical and reselling trades. We have the know-how to meet all your bio needs.

ADDING VALUE

Safe & Secure

Peninsula has almost 30 years experience in physical supply and reselling of marine energy. We have grown organically and carefully. Today we're a leading, global bunkering expert who you can trust. We deliver in every way.

Quality

Peninsula features an expert, in-house quality team to support all customers and keep your ships safe. From rigorous control of our physical products to consultancy on debunkering and claims assistance, our quality professionals are there to assist you.

Credit

Peninsula provides comprehensive credit solutions. We offer tailored options to cover all your trading needs. Peninsula's market-leading credit teams are renowned for their commercial underwriting and deep knowledge of prevailing shipping and commodity markets.

Governance and Compliance

Peninsula leads the marine energy industry in transparency and compliance standards. Working with Peninsula is the safest choice in bunkering.

PENINSULA'S STRATEGIC VISION IS CENTRED ON **THREE PILLARS:**

1

Customer Centricity

2

Sustainability

3

Technology

**We believe that excelling in these areas will drive success and innovation
in our industry, today and in the future.**

FUTURE FUELS

Peninsula believes there is no single correct choice of future fuel. A combination of options will converge in delivering zero emissions by 2050.

LNG provides emission reductions today and Peninsula is supplying and trading LNG to help customers achieve substantial CO2 reductions.

Biofuels are a further viable option today, which Peninsula is currently supplying worldwide.

We are working on several future fuel solutions that will pave the way to 'zero carbon'. At Peninsula, the ocean is our office and we are committed to protecting it.
