GLOBAL BIOFUEL SUPPLY. PROVEN EXPERTISE.

Peninsula currently supplies ISCC certified, sustainable biofuels across its global physical and back-to-back network. As a leading marine energy supplier, Peninsula has taken its almost 30 years' experience in conventional fuels and applied the same quality approach to low carbon alternatives.

Our dedicated biofuel desk ensures the highest quality of biofuels is sourced and blended to both ISO and customer standards – following the Peninsula sustainability standard framework so that you have confidence that your fuel has been sustainably sourced.

FULL CONTROL OF OUR BIOFUEL SUPPLY CHAIN

1

BIO CARGO

Peninsula's cargo networks ensure optimum sourcing options. We also trade cargo directly and offer credit and funding structures to support our purchasers.

2

BIO SALES

Peninsula's sales professionals provide bespoke sustainable marine energy solutions. With a focus on supply, our regional experts provide market intelligence, logistics and pricing.

3

BIO STORAGE

Peninsula's strategically located storage facilities ensure consistent supply and reinforce our logistics strength. Storage also enables us to blend and rotate our tanks to trade and sell cargos.

4

BIO OPERATIONS

Peninsula's operations teams ensure seamless supply and service delivery. Working 24/7 with ship agents, port authorities, barges, terminals and other intermediaries, we ensure smooth, incident-free supply for our customers.

5

BIO LOGISTICS

With deep rooted experience, Peninsula ensures operational excellence. Our tailored fleet supports specific supply operations, delivering an optimal balance of speed, quality, safety and reliability.

6

BIO SHIPPING

Peninsula's partner company, Hercules Tanker Management (HTM), provides comprehensive chartering solutions that support our global trading platform.

HIGH STANDARDS OF EXCELLENCE

PENINSULA SUSTAINABLE BIOFUELS:

- Are certified in accordance with ISCC sustainability standards
- Meet and exceed the sustainability criteria outlined in the EU Renewable Energy Directive (RED II)
- Align with the principles set forth by the Roundtable on Sustainable BioMaterials (RSB)

PENINSULA SUSTAINABILITY STANDARDS

Peninsula biofuels are derived from:

- Second generation only (*waste and residues*)
- ISCC compliant materials

Their contribution does not contribute to :

- Deforestation
- Direct or indirect land use
- Competition with food production

Peninsula Sustainable Biofuels are produced in a manner that maintains:

- Local water, soil and air quality
- Biodiversity
- Human, labour, and land rights
- Rural and social development
- Local food security
