

New Strategic Storage Facility in Rotterdam:

EXPANDING OUR CAPABILITIES AT CHANE TERMINAL

We're excited to announce a addition to our North European infrastructure: Peninsula is expanding its footprint in the Port of Rotterdam with a new storage setup at Chane Terminal, a strategically located terminals in the centre of Europe's largest port, Rotterdam.

THIS DEVELOPMENT IS ROLLING OUT IN TWO PHASES, BOTH BRINGING FRESH CAPABILITIES TO OUR OPERATIONS.

1

PHASE 1: NOW LIVE

9 new tanks with a total capacity of 30,000 cbm dedicated to bio blending and storage

ISCC certified and Nea registered, enabling full compliance and traceability

Flexibility to blend our own product, enhancing control, quality and flexibility

Capability of blending any biofuel grade (HSFO/VLSFO), from B5 to B100

Enhanced infrastructure with 3 jetties and 7 berths for barges up to 135m, plus 1 jetty for seagoing vessels

Inter-terminal transfer (ITT) possibilities with major oil companies

2

PHASE 2: EXPANSION

From January 2026, an additional 8 tanks will come online - boosting total capacity to 110,000cbm.

FLEXIBILITY:
Ability to blend our own product to preferred ratio desired

CONTROL:
Full control over the blending process and product quality

BREADTH:
Everything we do in ARA, we can do in ECNS - and more

This expansion not only strengthens our operational capabilities in the ARA region but also reinforces our commitment to sustainable and flexible fuel solutions for our customers.

THE CHANE TERMINAL WILL PLAY A KEY ROLE IN SUPPORTING OUR BIOFUEL STRATEGY AND DELIVERING VALUE TO OUR CUSTOMERS ACROSS EUROPE.
